

Ultrasound Bone Densitometer Professional Manufacturer
Ultrasound Bone Densitometer National Standard Drafting Unit
The First Domestic Products Pass EMC-Electro Magnetic Compatibility

BMD-A1 Assembly

Ultrasound Bone Densitometer

*Measuring Bone Mineral Density
or Bone Strength of the People's Radius
and Tibia. It is for Preventing Osteoporosis.*

Configuration:

1. BMD-A1 Ultrasound Bone Densitometer Main unit
2. 1.20MHz Probe
3. BMD-A1 Intelligent Analysis System
4. Luxurious Trolley
5. Dell Business Computer
6. Dell 19.5 Inch Color LED Monitor
7. Canon Color Ink Jet Printer G1820
8. Calibrating Module (Perspex sample)
9. Medical disinfection couplant

-  Large Scale Integrated Circuit
-  Multi - layer Circuit Board Design
-  High Shielding Multipoint Signal Contact Mode
-  Precise Brushed Metal Mould Manufactured
-  Special Analysis System Based on Different Countries People

Windows 10

BMD-A1 Assembly

Ultrasound Bone Densitometer

Characteristics:

- Full dry technology, makes diagnostic more convenient.
- Measurement parts: Radius and Tibia.
- The measurement process is simple and fast
- It with different countries clinical database, including: European, American, Asian, Chinese,
- WHO international compatibility. It measuring the people between the age of 0 and 100.(Children and Adult)
- English menu and Color Printer report
- Certificate: CE , ISO 13485, ISO9001, CFDA, ROHS, LVD, CFS

Application:

Our BMD have extensive application: it used for Maternal and Child Health Centers, Geriatric Hospital, Sanatorium, Rehabilitation Hospital, Bone Injury Hospital, Physical Examination Center, Health Center, Community Hospital, Pharmaceutical factory, Pharmacy and Health Care Products

The Department of the General Hospital, Such as Pediatric Department, Gynecology and Obstetrics Department, Orthopedics Department, Geriatrics Department, Physical Examination, Department, Rehabilitation Department
