

Ultrasound Bone Densitometer Professional Manufacturer  
Ultrasound Bone Densitometer National Standard Drafting Unit  
The First Domestic Products Pass EMC-Electro Magnetic Compatibility

# Ultrasound Bone Densitometer

## Portable Ultrasound Bone Densitometer

### Function:

Testing Bone Density through the radius and tibia For Preventing osteoporosis and Osteopenia

### Configuration:

1. BMD-A3 Ultrasound Bone Densitometer Main Unit
2. 1.20MHz Probe
3. Famous Brand Embedded Industrial Control Computer
4. BMD-A3 Intelligent Analysis System
5. Calibrating Module (Perspex Sample)
6. Disinfectant Coupling Agent

Note: Printer is Optional

-  Large Scale Integrated Circuit
-  Multi - layer Circuit Board Design
-  High Shielding Multipoint Signal Contact Mode
-  Precise Mould Manufactured
-  Famous Brand Embedded Industrial Control Computer
-  Special Analysis System Based on Different Countries People

# BMD-A3

## Ultrasound Bone Densitometer

### Characteristics:

- Portable Model, Easy to Move.
- Precise and Artistic Mould Manufactured.
- Full Dry Technology, Makes Diagnostic More Convenient.
- Measurement Parts: Radius and Tibia.
- The Measurement Process is Simple and Fast.
- High Measurement Speed, Short Measurement Time.
- High Measurement Accuracy.
- Good Measurement Reproducibility.
- The Particular Correction System to Correct System Error Effectively.
- It with Different Countries Clinical Database, Including: European, American, Asian, Chinese.
- WHO International Compatibility. It measuring the People Between the Age of 0 and 100.(Children and Adult).
- English Menu and Color Printer Report.
- CE Certificate, ISO Certificate, CFDA Certificate.

### Application:

Ultrasound Bone Densitometer BMD-A3 Has Extensive Application. This Portable Model is the Best Choice for Hospital outgoing Examination, Hospital Wards, Mobile Inspection, Physical Examination Vehicle, Pharmaceutical factory, Pharmacy and Health Care Products Promotion.

Our Ultrasound Bone Densitometer Always used for Maternal and Child Health Centers, Geriatric Hospital, Sanatorium, Rehabilitation Hospital, Bone Injury Hospital, Physical Examination Center, Health Center, Community Hospital, Pharmaceutical Factory, Pharmacy and Health Care Products Promotion.

The Department of the General Hospital, Such as Pediatric Department, Gynecology and Obstetrics Department, Orthopedics Department, Geriatrics Department, Physical Examination, Department, Rehabilitation Department.
